SUBJECT: Daily and Final Cover for the West Canyon Asbestos Lay
Down Area

Please work with BLP to have the slag daily cover requirement changed to a daily application of the soil cement we had discussed previously. Be sure that the contractor applies the material such that the cover is still in compliance with applicable Federal and State requirements. Final cover will continue to be slag.

Let me know if you have any questions or concerns
(206) 553-1220.
